

VALUETRAK'S NEW QUICKVIEW REPORTS

ValueTrak will now offer QuickView reports for best practice insights into your data allowing users the ability to filter the data to meet unique needs. The roll-out of the new QuickView reports will occur throughout 2020.

Initially, ValueTrak will offer redesigned standard versions of its most popular reports within the QuickViews & Reports Menu, including Location Detail, Sales and Inventory, and others listed below. All users who had access to the original version of the reports will have immediate access to the new QuickView reports upon deployment.

Throughout the year, ValueCentric will offer free online training to share “tips and tricks” on how to leverage the new QuickView reports as they are released. Look for dates and times in the VCU newsletter.

Let us know what you think about the new QuickView reports. Share your thoughts, experience, and additional report needs. If you have an idea for a unique report you would like included in ValueTrak, let us know!
